

Business Recommendations

1. Expand the presence of Tier 3 outlets, as they currently generate the highest sales performance.
2. Increase inventory levels for Fruits & Vegetables, Snack Foods, and Household products to avoid stock shortages.
3. Launch promotional campaigns for low-performing categories such as Seafood, Breakfast, and Starchy Foods to improve sales.
4. Analyze the operational performance of Supermarket Type 3 outlets and implement targeted improvement strategies.
5. Maintain strong availability of Low Fat products, as they represent the largest share of total sales.
6. Use Grocery Store outlets as performance benchmarks due to their higher customer satisfaction ratings.
7. Optimize inventory allocation based on outlet size, prioritizing Medium-sized outlets that generate the highest sales.
8. Introduce targeted marketing campaigns in lower-performing outlet locations to improve customer reach and sales.
9. Regularly monitor customer ratings to identify product categories requiring quality improvements.
10. Continue using data-driven sales monitoring dashboards to support business decisions related to inventory, expansion, and customer satisfaction.
